

We are an award winning group of gas safe registered engineers that are passionate about raising consumer awareness whilst inspiring and empowering engineers, merchants and manufacturers to drive positive change in our industry. Our four main campaigns are:

REGARD THE CARD

Always have your gas safe I.D. card on display and ensure this is shown to all customers. This will help us to educate the customers into recognising that only gas safe registered engineers should be used.

ANNUAL SERVICING

Promoting the need for improving boiler servicing standards in a consistent and environmentally friendly manner.

TRAINING

Encouraging employers to take on apprentices and encouraging them to train to apprentice board levels. GSSH also monitor training providers to ensure correct equipment, training and procedures are being adhered to.
